Week 5 Review

Here's what you need to know.

A Quick Note

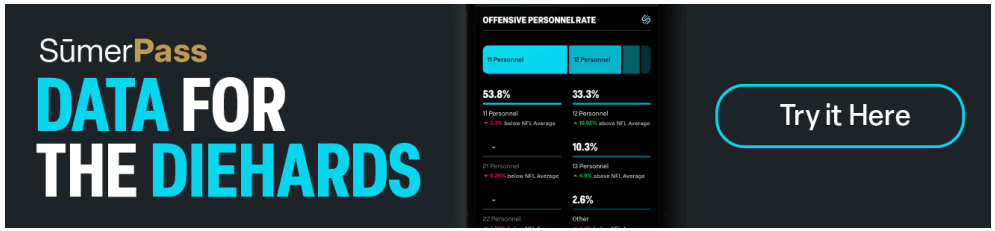

- The data you see here comes from SumerSports' SumerPass. We recommend you check it out if you want to dive deeper into the data, build your own stats, or get live charting on game days.
- Our weekly reviews will have the most important stats from Sunday, takeaways from three big games, game boxes for those matchups, and our leaderboards. The rest of the game review boxes can be found on Tej's page on Monday morning.

The Sunday Stat Scroll

Here are some of our favorite stats from Sunday.

- Drake Maye put up the best Total EPA performance of the season in Week 5.
- Mike Evans has the most 3rd down conversions of any wide receiver this season.
- The 2026 Vikings have the highest blitz rate of any team through five weeks since at least 2016. The 2023 Vikings sit at second place.
- The New Orleans Saints ran 43 plays on Sunday, the 3rd fewest of any team in a game this season.
- The Jets defense had a 99th percentile performance by success rate allowed.
- The Texans held the Titans to a 4th percentile offensive performance.
- The Patriots defense held the Raiders to their first negative EPA/dropback game of the season.

- Parker Washington's 352 receiving yards over the first five weeks of the season are the third most for a Jaguars pass catcher since at least 2016.
- The Green Bay Packers held the Chicago Bears to the 2nd lowest EPA/play in a game called by Ben Johnson.
- Jaxon Smith-Njigba has the highest percentage of a team's receiving yards through five games since at least 2016.
- The Philadelphia Eagles had their fewest rushing yards in a game since at least 2016.
- Kyler Murray had his highest scramble yards total in a game since Week 7 of 2024.

Three Takeaways

San Francisco 49ers 32, Seattle Seahawks 29: The 49ers sit atop the NFC West after a slugfest in Seattle.

- The 49ers run game produced the highest designed rush success rate in any game against a Mike Macdonald defense. They had an 80% success rate on outside zone and had 3.1 yards before contract on those runs. The Seahawks previous opponents averaged 0.7 yards before contact on outside zone.
- Turnovers were massive in this game as the Seahawks had a 98th percentile EPA lost to turnovers and 99th percentile win probability lost to turnovers. the 49ers had a 94th percentile total EPA lost to turnovers and 96th percentile win probability to turnovers. This game had the most turnovers of any game this season.

- Brock Purdy was sacked for the first time this season as Seattle brought him down three times. Purdy’s time to pressure faced was only in the 20th percentile, so pressure took longer than usual to get to him.
- Mike Evans continues to be a huge addition for the 49ers. He had a 37% target share and 96th percentile yards per route run in Week 5.
